

Jenna Perstlinger, AIA, NCARB, CPHC

Project Architect

Phone: +1 (720) 208-6570

Email: jenna@basecampaec.com

Professional Profile

Ms. Perstlinger is a licensed architect in Colorado and Texas with over 10 years of experience in the design and construction industry. Skilled in hand-drawing and written communication as well as computer-aided drafting, she completed code reviews, client presentations, development drawings, construction documents, and construction administration for single-family residential, hospitality, and retail projects at some of the premier Classical architecture firms in the country.

Ms. Perstlinger has a keen interest in architectural details - both on and beneath the surface – which drives her interest in building science and traditional architecture.

At Basecamp, Ms. Perstlinger investigates building envelope issues as well as architectural fit and finishes. Her experience with materials and construction techniques enables her to assess the condition and soundness of both interior and exterior finishes, including wood, drywall, AMV, and stucco, as well as the thermal, airflow, vapor, and moisture performance of the overall wall assembly.

Ms. Perstlinger holds master's degrees in fine arts, landscape architecture, and architecture. Additionally, she is a certified Passive House consultant, demonstrating advanced knowledge of the relationship between architectural and mechanical design.

Ms. Perstlinger is also a disaster service worker through CalOES, volunteering her professional skills to evaluate the safety of buildings after natural disasters.
